

Product Supplier	Craster
Product Name	Flow Frames - Black Powdercoated
Codes	BU_FL021, BU_FL022, BU_FL023, BU_FL024, BU_FL025, BU_FL026, BU_FL027, BU_FL028, BU_FL029, BU_FL030
COO	China
Material	Mild Steel
Finish	Powdercoated - RAL9005
Product End Use	Display Stand - not intended for direct contact with food.
Declaration of Compliance	This item is not intended to come into direct contact with Food.
Revision Date	10/12/2018

Material Information

The frames are constructed from powder coated mild steel. The frames include plastic feet to stop the riser from damaging counter surfaces.

Cleaning & Maintenance

Powder coat:

Powder coating offers a robust decorative surface protection, and prevents the underlying mild steel from rusting. Although the powder coat is tough, it can be damaged by improper use, handling or storage. Take particular care not to knock frames together or against hard surfaces.

Cleaning:

The frames should be wiped clean with a slightly damp non-abrasive cloth, with a mild detergent. Do not use strong cleaning chemical, alkaline, acidic or bleach.

Storage:

Do not allow the frames to remain in contact with liquids for a prolonged time. Store cleaned and dried frames in a dry location.

Repair:

Small sections of damage can be repaired using touch up paint, supplied by Craster on request.

Caution

DO NOT use abrasive cleaning products or chemicals, alkaline, acidic or bleach

DO NOT allow the frames to remain in contact with liquids for a prolonged time

DO NOT use in the dishwasher
