Material Information

All Flow plinths are made from solid, natural timbers with a mineral oil finish. Please note that while we carefully select high quality timbers, natural variations in color and grain can occur.

Cleaning & Maintenance

Timber products are NOT suitable for dishwasher cleaning. Craster recommends cleaning with a non-abrasive cloth using a mild detergent. Ensure all detergent is removed with damp cloth and dry thoroughly with a soft towel to prevent water spots. Leave to fully dry in a rack with the end grain exposed until fully dry - do NOT stack until dry.

Craster recommends regularly re-oiling the surface with Craster Mineral Oil to protect the natural timber and maintain a slightly polished look. For longevity, we also recommend not to display wet foods on this range of products.

Caution

- DO NOT clean in the dishwasher.
- DO NOT leave to soak in water.
- DO NOT use under heat lamps.
- DO NOT use on hot plate.
- Strong coloured foods may stain oiled wood - use greaseproof paper for protection.
